Test codes using cypress:

1. Login Test Code:

```
            function loginUsingForm(username: string, password: string)
{
            cy.visit('URL');
            cy.visit("/signin");
            cy.get("[data-cy=signin-button]").click();
            cy.get("[data-cy=signin-email-form]").should("be.visible");
            cy.get("input[name=username]").type(username);
            cy.get("input[name=password]").type(password).type("{enter}");
            cy.location("pathname").should("include", "/profile");
            cy.get("[data-cy=navbar-menu-avatar]").should("be.visible"); }
```

2. Language Selection Code:

```
cy.visit('URL');
cy.visit("/language");
cy.get("[data-cy=language-button]").click();
cy.get("[data-cy=english-button]").click();
cy.get("[data-cy=cars]").should("be.visible");
```

3. Contact Us Code:

```
cy.visit('URL');
cy.visit("/contact us");
it('Submit form', () => {
cy.get('.action-form')
.find('[type="Name"]').type('Name')
.find('[type="email"]').type('email')
.find('[type="phone no"]').type('phone no')
.find('[type="message"]').type('message')
cy.get('.action-form').submit()
.next().should('contain', 'Your form has been submitted!')
  });
```
